

## PlasterMax

*PlasterMax is a high performance interior finish that naturally bonds with EPS foam used in both retro-fitting and new construction.*

*Comparison chart using PlasterMax v Drywall.*

	PlasterMax	½" Drywall
Impact Resistance	HIGH	LOW
Abrasion Resistance	HIGH	LOW
Made from Healthy Materials	YES	NO
Carbon Footprint	490	730
Zero VOC's	YES	NO
Mold & Mildew Resistant	YES	NO
<i>Total Installed &amp; Painted Cost</i>	<b>\$3.25 / SF Avg.</b>	<b>\$3.75 / SF Avg.</b>

### **Performance Benefits -**

- PlasterMax is the only code approved finish that replaces wallboard on EPS
- Single coat applications from 1/8" to 1/4"
- Provides tough protective ceramic finish over ICF and foam SIP's
- Impact resistance (ASTM C1629)
- High abrasion resistance (ASTM D4977)
- Zero flame spread and smoke developed (ASTM E84)
- Non combustible building material (ASTM E 136)
- Smooth or textured finishes-readily accepts paint
- Applied by conventional spray pumps or hawk and trowel
- Exceeds EPA and CA indoor air quality & VOC standards (AQS, report No. 157763)
- Environmentally sustainable contains NO crystalline silica
- Mold and mildew resistant (ASTM G21 and ASTM C 587-04)
