

StuccoMax™

GiGACRETE

StuccoMax™ is a truly green non Portland cement base exterior wall finish coating. StuccoMax™ utilizes fiberglass mesh for thin applications and may be direct applied to EPS foam and ICF construction exteriors.

StuccoMax™ performance is unmatched with excellent water resistance, impact and abrasion resistance and low permeability. It is also less sensitive in low installation temperatures. StuccoMax™ is hand or machine applied with numerous texture possibilities. StuccoMax™ leads the industry in innovation when low embodied energy, high performance and cost effectiveness is required.

StuccoMax™

GIGACRETE

Fast project turnaround is a StuccoMax™ trademark

Speed and ease of application make it contractor's first choice!

Profitable yet cost effective

Beautiful finishes are easily achieved

Sustainability:

Low carbon footprint.

World's first "GREEN" Stucco.

Environmentally responsible, sustainable, recyclable.

Safer installation with no crystalline silica added.

Green doesn't have to cost more.

PERFORMANCE BENEFITS

- Single day application
- High early strength gain
- Impact and abrasion resistant
- Low shrinkage minimizing cracking
- Highly water resistant
- Resistant to freeze/thaw damage
- Highly resistant to sulphate attack
- Low permeability
- Hand or machine applied
- Direct application to EPS and other substrates
- Low temperature applications
